• Continental Dairy Facilities Southwest, LLC located in Littlefield, Texas will be a dairy processing facility owned by Select Milk Producers, Inc. a Dairy Farmer Co-op.
• The 92 Co-Op members are located in Michigan, Indiana, Ohio, Texas, Oklahoma, and New Mexico. They currently produce approximately 6 billion pounds per year or 329 – 6,000 gallon tankers per day.
• 5th largest milk Co-Op in U.S.
• Lead Producers in quality cow/ herd health and leaders in sustainability.
**History**

- Continental Dairy Facilities LLC and Select Services were formed in April 2009.
- Continental Dairy Facilities LLC operates a sister plant in Coopersville Michigan which is a twin to the Littlefield plant being designed.
- Select Services is a business development company tasked with designing and building the plant.
- Select Milk Producers purchased former American Cotton Growers Facility in 2015.
- Continental Dairy Facilities Southwest LLC works with Select Services on the design of the plant and will operate the plant when construction is completed.
- Construction is set to break ground summer 2016.
- Commissioning is set to begin August 2018.
- Creation of 125 Full time jobs.
Keeping it Local

- With the surge in increased milk production throughout the past 15 years, Select Milk Producers chose to build a Dairy Food Ingredient Facility to help balance milk for Select Milk Producers and other surrounding cooperatives as well.

- Keeps local milk in Texas preventing milk from being shipped out of state at substantial costs to Texas dairy farmers.

- Plant will receive 4 million lbs. of milk daily (80 trucks)
Production Data

- 4,000,000 million pounds of raw milk per day.
