### **CDOT Recommends Ports-to-Plains as Critical to Rural Freight Movement**

“CDOT recommends, at a minimum, including Congressional High Priority Corridor in the designation of the Final NMFN. Specifically, in Colorado these include: The Heartland Expressway (Corridor 14), The Ports-to-Plains Corridor (Corridor 38), and The High Plains Corridor (Corridor 48)”, wrote the Colorado Department of Transportation.

The United States Department of Transportation (USDOT) closed a comment period on September 6, 2016 allowing state departments of transportation (DOTs) to make recommendations to the Undersecretary of Transportation for Policy on critical rural freight facilities and corridors that should be included in the National Multimodal Freight Network (NMFN). The NMFN looks to the future with the purpose of assisting states in directing resources, informing freight transportation planning, and assisting in prioritization of Federal investment.

Both the Ports-to-Plains Alliance and Colorado Department of Transportation submitted comments urging USDOT to include the Ports-to-Plains Corridor in this Final National Multimodal Freight Network.

Michael Reeves, President of the Ports-to-Plains Alliance, submitted the following request: *“The Alliance respectfully requests the Under Secretary of Transportation for Policy to include in the Final National Multimodal Freight Network the Ports-to-Plains Alliance Corridor, which is made up of congressionally-designated high priority corridors and is critical to international freight movements.”* Reeves also stated *“The Alliance requests the Under Secretary of Transportation for Policy to give special consideration to comments made by states that identify portions of the Ports-to-Plains Alliance Corridor that meet the criteria for Critical Rural Freight Facilities and Corridors for inclusion in the National Multimodal Freight Network.”*

In addition to these comments, the state departments of transportation in Texas, Nebraska, Wyoming, South Dakota, North Dakota, and Montana also recommended the entire corridor for inclusion in the Final National Multimodal Freight Network. The US DOT has until December 4, 2016 to make the final designations for the NMFN.
